“1. As one of the measures for making Insurance more popular among the poorer classes the Insurance Committee propose the entertainment of proposals of Rs. 100 on the strength of Ordinary Medical Certificates. The scheme is intended to be in the nature of an experiment till the next actuarial valuation.

(1) The Examining Medical Officer will be required to give an Ordinary Medical Certificate after going through all the formalities of a detailed Medical Examination but he need not actually record the results of such examination in detail.

(2) He will be entitled to a fee of Re. 1 only as in the case of revival of policies and it will be paid by the party himself.

(3) Unless any doubt arises, these Ordinary Medical Certificates will not be referred to the Senior Surgeon and no cost will be incurred on account of his fees.

(4) The Helpers will be paid a lump sum of Re. 1 per proposal without any further claim for remuneration on renewals.

(5) Bonus payable in respect of the policies obtained under this scheme will be limited to half of that allowed on other policies.

(3) Unless any doubt arises, these Ordinary Medical Certificates will not be referred to the Senior Surgeon and no cost will be incurred on account of his fees.

(4) The Helpers will be paid a lump sum of Re. 1 per proposal without any further claim for remuneration on renewals.

The accompanying extract from the report of the Silver Wedding Fund Authorities for the year ending the 31st December 1931 is published for the information of the public. Applications from qualified persons are invited which may be sent to the Director of Public Instruction in Mysore, Bangalore, not later than 15th September 1932.

Rules for the award of scholarships from the Silver Wedding Fund for study abroad.

An occasional scholarship may be awarded from the Fund from time to time for higher training outside India. No applications are invited for such scholarship but Directors of Public Instruction are at liberty to submit the applications of suitable candidates before the first of January for the year in which they desire to pursue their studies in Europe. The scholarships may be of the value of £ 300 a year tenable for a period of three or four years according to the course of study to be pursued; free second class passages from Bombay to London and back are provided. Such scholarships were originally confined to graduates of Indian Universities under the age of 22 years, but it has been subsequently decided to consider also applications from non-graduates who are successful in examinations not conducted by a University, and to refrain from laying down any hard and fast rules specifying on age limit. A scholarship will not ordinarily be awarded to students to study subjects in which suitable provision for training is available in India. Furthermore, only those students will be considered for scholarships who are brilliant and whose fathers have rendered exceptional services and have very limited means.

UNIVERSITY OF MYSORE.

Circular No. 3261, dated 8th August 1932.

Enquiries are being made by candidates not successful at University Examinations regarding the exemption from further attendance at classes before appearing again.

Attention is invited to Ordinance 60—A (extracted below) according to which a student who has completed the course for any examination in a certain year can appear for the examination without further attendance, only within the next three years. After the expiry of this period, further attendance at the final year class is necessary and such attendance should be supported by the requisite certificate under Ordinance 60 (also extracted).

It is to be noted that part-time attendance in the Senior Class during the whole or any fraction of the above three-year period cannot be recognised as attendance within the meaning of the Ordinance. Attendance as a whole-time student of either the regular classes or special classes (that may be organised for failed students) in all subjects will be recognised as sufficient for the purposes of the Ordinance, if supported by the term certificate required by the rules.

By Order,
V. GOPALASWAMI AIENGAR
Registrar.

Ordinance 60—A.

A student who has attended the course of studies for any examination for one full year may be permitted a break in continuity for a period not exceeding one year. A student who has completed the course of studies for any examination may be permitted to appear for the examination within a period not exceeding three years after the completion of the course. After the expiry of such period of three years he shall be required to attend again the final year of the course before he is permitted to appear for the examination.

This rule shall apply to the Intermediate, B.A. (Pass and Hons.) and B.Sc. (Pass and Hons.) Examinations.

Ordinance 60.

In the case of all Degree Courses, each year shall be taken as a unit for purposes of calculating attendance, and a student shall be considered to have completed the attendance for the year, if he has attended not less than three-fourths of the number of working periods in each of the subjects comprised in the course and his progress and conduct have been satisfactory. The Council shall have power to condone shortage of attendance on the recommendation of the Heads of Colleges.

Applications for condonation of shortage of attendance shall be made to the Registrar in the month of February each year.

The sale will be held by the Sub-Division Officer, Mysore, on the 17th September 1932, at the Yedatore Taluk Office.

5. Boy candidates will not be admitted to the Mysore Middle School Examination by *Private Study* unless they send with their application form sufficient proof to show that they had sat for the English Lower Secondary or Middle School Examination (with English as First Language) in 1932 or before and had failed at the Examination or unless they are specially permitted by the President, Local Examinations Boards and in such cases the certificate granted by the President should be attached to their applications for admission to the Examination. (a) Candidates should be asked to give their *correct* date of birth both in the applications and their S. S. L. C. cards as entered in the admission register of the School without giving room for unnecessary correspondence in the matter. They should be advised to enter *only* the father's name in the S. S. L. C. card and the application form and not the guardian's name.

(b) Heads of Schools should arrange the applications and the S. S. L. C. cards separately in the same order, firstly according to the Second Language chosen by them and secondly in the alphabetical order under the several second languages. In no case should the applications and the S. S. L. C. cards be mixed up, as this will lead to confusion while checking the applications. The applications and S. S. L. C.'s of candidates who have been declared "Passed" in previous years should be separated from others and arranged in the same manner as noted above.

(c) A classified statement showing the names of candidates under "Ordinary" and "Supplementary Certificates", the several second languages and additional subjects offered by them should accompany the applications for candidature.

11. Applications for the Teachers' Certificate's Examinations (both Theory and Practical) from private candidates who have not appeared for the Teacher's Certificates Examination of the particular grade and failed at least once either under the old rules or under the revised rules will be rejected. But Teachers in recognised Schools who have put in ten years' service or more and who had no chance of being deputed for training by the Department shall be admitted to the examination by private study, subject to the condition that they possess the minimum general qualifications prescribed for the respective grade of Examination. A candidate appearing for the examination under this rule shall produce a certificate from the Inspecting Officer not less in rank than an Assistant Inspector of Education to the effect that he or she has put in not less than ten years' service as a teacher in a recognised school in Mysore.

12. Candidates who appeared for and failed in the Preliminary Examination (L. S. T.C.) either in Group A or Group B or both in previous years will be required to take the full Examination (Preliminary and Final) and they should pay the full fee for the examination.

13. It should be clearly understood that the provisions in this notification do not in any sense supersede the detailed notifications relating to the several examinations and that the provisions in the detailed notifications should be fully satisfied before any candidate is registered for the examination for which he seeks admission.

MISCELLANEOUS DEPARTMENTS.**OFFICE OF THE REGISTRAR OF CO-OPERATIVE SOCIETIES IN
MYSORE, BANGALORE.**

Notification No. 1407 C.S., dated 22nd—26th August 1932.

It is hereby notified for general information that "Desaranjana" a bi-monthly illustrated Kannada Magazine published at Mangalore, S. Kanara, is recommended as being suitable for being subscribed by all Co-operative Societies maintaining Reading Rooms, as it is replete with matter useful, instructive and interesting to Kannada readers.

Circular No. 6 C.S., dated 25th August 1932.

To—The Secretaries of all Urban Co-operative Societies in Mysore State.

It has come to the notice of the Registrar that a few Co-operators are contemplating the holding of a Conference of Urban Co-operative Societies only during the Dasara Week at Mysore, independent of the 19th Mysore Provincial Co-operative Conference arranged to be held by the Mysore Co-operative Propagandist Institute. As all Co-operative problems, Urban as well as Rural can be discussed at the Provincial Co-operative Conference itself and there does not seem to be any need for holding a separate Sectional Conference, the Registrar desires to state that the Urban Co-operative Societies in the State do well not to Co-operate with the organizers of this Sectional Conference. Government have also been pleased to order that no such Sectional Conferences should be held at Mysore during the Dasara Week.

Notification No. 1377—C. S., dated 24th August 1932.

Notice is hereby given that the 19th Mysore Provincial Co-operative Conference has been arranged to be held at Mysore in the first week of October 1932, by the Mysore Co-operative Propagandist Institute.

Opportunity will be taken of this occasion to present His Highness the Yuvaraja's shields to the winner societies.

The subjects proposed by the societies to be discussed at the Conference may be sent to the Secretary of the Mysore Co-operative Propagandist Institute or to this office in the form of proper resolutions clearly expressed on or before the 31st August 1932 in accordance with the circular already issued by the Propagandist Institute.

All the societies in the State are requested to send delegates and visitors to the Conference. Opportunity may be given to public spirited and well-to-do members of Co-operative Societies to represent their societies as delegates without any cost to the societies concerned. When, however, this is not possible, societies are authorised to pay their delegates third class fare for both journeys and actual cart-hire besides a daily batta of Rupee one to Rs. 1-8-0, per delegate per day. The bigger societies with larger capital may vote single second class fare according to the status of the delegates selected. No expenditure can be incurred on visitors.

Managing Bodies of societies are also authorised to pay subscriptions to the Conference on the scale given below :—

The following Memorandum regarding Post Graduate Courses in Agricultural Science at the Imperial Institute of Agricultural Research, Pusa, is published for the information of those who intend to undergo this course. In view of the delay in issuing this memorandum the date for receipt of applications by provincial authorities is extended for the current year to the 1st of October 1932, and that for receipt of applications in the office of the Director of Imperial Institute to 25th October 1932.

H. V. KRISHNAYYA,
Offg. *Director of Agriculture.*

Memorandum regarding Post Graduate courses of the highest possible standard in the special branches of Agricultural Science at the Imperial Institute of Agricultural Research, Pusa.

The position which the Pusa Imperial Research Institute is intended to occupy in relation to the Provincial Agricultural Colleges is that of a higher teaching institution. Its main object is to enable students, by means of Post Graduate courses of the highest possible standard, to qualify for the best appointments in the special branches of Agricultural Science in India. Facilities similar to those available abroad are afforded to Indians who wish to qualify themselves for superior posts in the Indian Agricultural Department. Specialised courses are given in Agricultural Botany with special reference to plant genetics, biometry and field trials, Mycology, Entomology and Agricultural Chemistry with special reference to soil science and also in Animal Nutrition. Facilities are also available for Post Graduate training in farm organisation, farm management and general farm engineering. All these courses begin from 1st November each year, except that in Animal Nutrition (the Animal Husbandry and Dairying course) which commence on 2nd January and lasts for 15 months (as in attached memorandum).

Qualifications for admission.—Distinguished graduates who have obtained the highest degree in science, short of a doctor's degree awarded by the University from which they come, graduates of Agricultural Colleges who have passed in first class or have otherwise attained a high position in the college gradation list, and selected officers of Agricultural Departments provided they are fully qualified to take advantage of the courses and are recommended by the Government of the province in which they may be serving are eligible for admission to these courses.

Age.—The maximum age limit is 25 years and the minimum 21, but the Director has the right to waive the limit in special cases.

Conditions of admission.—Intending students should apply in the form attached, to the Director, Imperial Institute of Agricultural Research, Pusa, through the Director of Agriculture—or direct, where no such officer exists—of the province or state in which they are resident so as to reach the latter on or before the 15th September.* Candidates resident in Sind should apply through the Chief Agricultural Officer, Sind, and those resident in the north-west Frontier Province and in Baluchistan through the Agricultural Officer of the province concerned. Candidates will have to appear, at their own expense, before the Provincial Selection committee set up for the purpose, whose recommendations will be considered by the Selection Committee at Pusa which will have the final voice in the selection of students. Candidates who have not gone before a Provincial Selection Committee will be liable to appear before the Selection Committee at Pusa.

Fees and accommodation.—A tuition fee of Rs. 25 per month will be charged from each student, which will be payable in advance for each term, viz., in November for the November-April term and in July for the July-October term. Furnished rooms in the Hostel will be provided for accommodation, but the students will have to make their own arrangements for meals. Separate kitchen will be provided, if necessary, for different castes and religions. Expenses of living at Pusa will not exceed Rs. 40 per head monthly. In addition to the fee, a sum of Rs. 15 to Rs. 30 will be required for the purchase of books.

* In view of the delay in issuing this memorandum the date for receipt of applications by provincial authorities in 1932, is extended to the 1st October.

Courses.—The training in each branch will last for two years except in the case of the course in farm organization etc., which will be for a year. Attention will be given more to the association of Post Graduate students with research work in progress than to the institution of any hard and fast course of instruction.

Prospects.—The students after successfully undergoing the complete course of training will be eligible for appointment to the superior posts in the Agricultural Department but Government does not guarantee any post to successful candidates.

Stipends.—No stipends are given to students undergoing the course.

Including the Second Magistrate's Court, Shimoga, and the temporary Additional District Court, Bangalore, there were 34 Courts exercising original jurisdiction and 11 including four Additional Subordinate Judges at Bangalore, Kolar, Mysore and Chitaldrug, and the temporary Additional District Judge's Court exercising appellate jurisdiction. The vacation for the subordinate Civil Courts commenced on 4th April 1932 and ended on 14th May 1932.

SUBORDINATE JUDGES COURTS (7).

The disposals were 88 as against 104 in the corresponding quarter of the previous year and the number pending was 626.

(a) DISTRICT COURTS (4).

III Original Work.—The number of suits instituted and disposed of was 12 and 13 respectively as against 12 and 3 in the corresponding quarter of the previous year and the number pending was 238 against 239 in the previous quarter.

(b) SUB-COURTS (3).

The institutions and disposals were 50 and 43 respectively as against 54 and 57 in the corresponding quarter of the previous year and the number of cases pending was 474 against 467 in the previous quarter.

The presiding officers are requested to see that the disposals are better.

The numbers of Small Cause suits instituted and disposed of were 2050 and 1541 respectively as against 1808 and 1494 in the corresponding quarter of the previous year and the number pending was 2756 against 2247 in the previous quarter.

(c) MUNSIFFS' COURTS.

The institutions and disposals of Small Cause suits were 4097 (including 210 transferred cases) and 2910 respectively as against 3755 and 2979 in the corresponding quarter of the previous year and the number pending was 4655 against 3678 in the previous quarter.

The number of original and Small Cause suits pending over one year was 4471 and 421 respectively as against 4296 and 324 in the previous quarter.

The presiding officers of the several Civil Courts should pay particular attention to the disposal of old suits and to the reduction of pendency.

The increase in the pendency is partly due to the intervention of the Summer Vacation and partly to the institution of large number of cases after the re-opening of the courts, which could not be disposed of before the end of the quarter under review.

OFFICE OF THE SECRETARY, MOTOR TRANSPORT COMMITTEE,
BANGALORE.

No. M. 156—M. T. C. dated Camp Mysore, 14th November 1932.

In pursuance of their terms of reference, the Committee which was appointed under Government Order No. P. 21-29—Legis. dated 10th October 1932 to enquire into the questions relating to the Regulation and Taxation of the Motor Traffic in the Mysore State, have issued the Questionnaire of which a copy is attached.

Copies of this have been sent to leading officials and non-officials who are likely to have special knowledge of the matter.

An invitation is hereby extended to any gentlemen interested who have not received copies, to send to the Committee any replies or suggestions they have to offer with reference to the Questionnaire, as a whole or to any particular questions that are included in it.

It is requested that replies may be sent to the Secretary, Motor Transport Committee, Mysore, before the 28th November 1932.

H. RANGACHAR,

Secretary,
Motor Transport Committee.

MOTOR TRANSPORT COMMITTEE, MYSORE.

QUESTIONNAIRE.

1. Do you accept the following as an accurate account of the existing system and the difficulties which have arisen out of it? If not, will you suggest the amendments you think necessary?

The existing system is one of limited monopoly in so far as there are more applicants for permits to run services than there are services required, and the permits, which are potentially valuable property, are given only to selected persons. These persons are controlled by (a) limitations on selection, (b) limitations on times of running, (c) limitations on fares, (d) qualifications of drivers, and (e) specifications of vehicles.

Limitations on selection.—The provisions of the rules and orders are that the persons selected as holders of permits should be persons of substance and business capacity and capable of running moderate sized services. In practice, it appears that a great majority are persons of very little substance. For instance, in the Bangalore District, out of 155 permit-holders, no less than 105* are the owners of only one bus apiece. Some of the permit-holders are incapable of conducting the business, and the majority take no personal part in it. The actual work is delegated to drivers and cleaners, some of whom are very poorly paid, and to men known as "loaders," who harass the passengers in endeavouring to compel them to use the buses of particular owners. The main ground of selection is priority of application, and so much trouble has occurred in connection with transfers of permits that the Government have had to take the matter into their own hands.

Limitations on times of running.—The rules and orders provide that fixed timings shall be specially arranged for each service on each road, that no service shall run from any point within an hour before or after the time of departure of a train running in the same direction, and that, when new permits are given, the timings allotted to the holders shall only be such as will not interfere with those allotted to permit-holders already at work on the road. In practice, it is extremely difficult to work out a scientific time-table on this basis. The restriction with reference to railway timings cuts out a considerable part of the day, and it has been found impossible to apply it at any but the starting stations. Since the traffic is greater at some times of the day than at others, it is obvious that there must be great inequality between the permit-holders who secure the popular times and those who do not, and various arrangements have been entered into or suggested for the purpose of equalising things, as for instance, by giving different owners the popular times on alternate days. The large number of permits granted has led in places to such crowding of time-tables that there are inadequate intervals between the services run by rival companies, and many instances are given of abuses, as for instance, by buses starting at the scheduled times from the prescribed starting places, but waiting for long periods, a short distance off, to collect passengers. The arrangements for checking the times, which are conducted largely by illiterate constables, have been inadequate to prevent this, and the number of checks applied is larger than is necessary.

Limitations on fares.—Recent orders fix both maximum and minimum rates of fares per mile, but there are no orders either fixing definite rates for particular journeys or requiring the permit-holders to fix them. Consequently, the public are at the mercy of the permit-holders or their subordinates. Instances of the results of this are given in the case of a service in which the charge for a return journey is 50 per cent more than the charge for a journey out, for the reason that the passenger who has gone out has no option but to come back by the bus, which has him at its mercy. Or again the levy of what is practically blackmail from short distance passengers, whom the conductors refuse to carry except at fares out of all proportion to the distance involved or to the fares already levied from persons who have travelled longer distances.

NOTE.—These figures are for the Bangalore District only. Some of these owners may own buses in other districts.

Qualifications of drivers.—Under recent proposals, drivers will be required to be not less than 25 years of age and to have held their driving licenses for not less than three years. They will be required to produce medical certificates from District Medical Officers. Complaint is made that owing to extreme competition, the men employed are only those who will accept what is really less than an economic wage; that they are kept on duty for much longer hours than they ought to be; and that they are insufficiently acquainted with the mechanism of their vehicles and often drive recklessly and refuse to observe the normal courtesies of the road.

Specifications of vehicles.—The rules require that a vehicle should pass a brake-test once in three months, that the driver should be fenced off from his neighbours in the front seat and that he should carry a proper equipment of tools and spares. It is stated that the brakes are frequently not operative, and that drivers are not sufficiently cut off from the passengers sitting each side of them to be able to devote their whole attention to their work. Instances have been given of breakdowns when necessary spares were not available. There have also been cases in which serious accidents have been aggravated by the inability of the passengers to get out of the vehicles in times of danger.

2. It has been suggested to the committee that there are two main alternative ways of getting over the difficulties outlined above, namely, (a) to grant permits freely to all applicants with permission to run on any road they please, and to let matters settle themselves by a process of survival of the fittest, subject to a system of strict supervision to prevent practices that are dangerous to the public; and (b) to introduce a regular system of monopoly by defining groups of services in all particulars and then inviting tenders for the privilege of conducting them. Do you advocate either of these two measures? If so, which and under what restrictions?

3. Another view taken is that, while it is desirable to limit the number of permit-holders plying on the same road and to introduce the element of competition in deciding which of them is to have the privilege, it is also desirable to give a preference, so far as possible, to existing permit-holders in making the selection, and to ensure that as many of them as possible are given permits for services which will enable them to recover a return on the capital they have actually invested. Would you approve of a system on this basis? If so, how would you arrange the selection?

4. A draft form of tender notice is attached as an appendix. Will you please consider this and say what modifications, if any, you have to suggest in it?

5. If none of the three systems appeals to you, will you suggest the arrangement which you would advocate?

6. *Buses hired for special trips.*—e.g., A school treat: if the right of running buses over certain roads is to be limited to particular individuals, should it include the right of running buses for special trips over the same roads? If so, should the persons licensed to run on those roads be required to run special buses at the same rate of fares as other buses? Should the right be reserved to the Deputy Commissioner to give special permits for buses belonging to other owners? Should this right be limited to the case where the persons licensed for the road have no buses readily available?

7. *Buses running from and to British India.*—If the right of running buses on particular roads is limited to particular persons, are buses running outside Mysore to stop at the frontier unless they hold permits for Mysore roads? Is it desirable for the Government to endeavour to make arrangements with the British Indian authorities in regard to the taxation of Mysore buses which are allowed to run to destinations in British India, or may the bus owners be left to make their own arrangements?

8. Very conflicting figures have been given to the committee in regard to the cost of running a motor bus. If you have any experience in this matter, will you give what you consider a fair approximation to the cost of running per mile under the following heads?—

(1) Interest on capital cost (it is presumed that the capital invested in the purchase of the vehicle will be recouped by a depreciation fund, so that the interest on capital cost will remain a constant figure throughout).

(2) Depreciation.—Please state term of life assumed and scrap value.

(3) Repairs and replacements.

(4) Petrol.

(5) Oil.

(6) Wages.

(7) Rent.

(8) Management and overhead charges.

(9) Insurance.

It is understood that the figure per mile will be arrived at by taking the total cost for a period which represents a certain mileage and dividing the figures so arrived at by the mileage which is presumed to have been run.

9. It has been represented that, with motor buses and permit-holders of the present type, a number of lives may be lost or extensive danger done to property, e.g., that of another user of the road, and it may be impossible for the injured party to recover anything on account of the inability of the motor bus owner or driver to pay. Do you consider that insurance against third party risks

should be made compulsory? What do you consider is a fair rate to pay for this? Would it be appropriate to move the Government to undertake this insurance at a cheap rate as a function of the State Insurance Committee?

10. The State Railways represent a very large investment of money on the part of the taxpayer and are losing money through the competition of motor buses. How far do you consider it legitimate to make the passenger take a less convenient route in order to avoid this loss to the railway? Please illustrate your reply with reference to the following instances:—

Mysore to Krishnarajasagara,
Bangalore to Nandydroog,
Bangalore to Kolar.

11. Do you agree that buses should be allowed to compete with the railways on short lengths of road which run parallel and adjacent to the line and that no buses should be allowed to run parallel and adjacent to the line for long runs as, for instance, from Bangalore to Mysore?

12. Would you approve of the routes parallel and adjacent to the line being reserved for services to be conducted by the Railway Department?

13. The present arrangements as regards the taxation of passenger vehicles plying for hire other than motor buses, that is, all vehicles carrying less than 8 passengers, are that a fee of Rs. 50 is charged. It has been proposed by the Tolls Abolition Committee that these vehicles should be made subject, in lieu of tolls, to taxation based on the number of seats similar to that proposed in the case of motor buses, that is to say, at the rate of Rs. 30 a seat. Do you approve of so taxing these vehicles? Do you anticipate any increase in their use such as will further decrease the first and second class traffic on the railways? If the buses are still to pay a road cess in addition to the taxes in lieu of tolls, is the above taxation sufficient, in the case of other motor vehicles plying for hire which would pay nothing in place of the road cess?

14. It has been suggested that the present system of dealing with motor transport by district authorities has led to great variations in policy, with the result, for instance, that permits are much more liberally granted in one district than in another. Or again, that far more permits are given for single buses in one district than another, the figure for Bangalore being 105 and those for Shimoga, Kolar, Mysore, Hassan and Tumkur, 42, 27, 13, 8 and 6, respectively. Permit-holders also complain that difficulties have arisen where a bus service passes from one district to another when the two local authorities pursue different policies. Do you consider that more co-ordination between the licensing authorities is necessary? If so, how should it be applied? Would you approve of the institution of a Road Board which would undertake the supervision of the collection of all the road revenues and the repairs and improvement of all the roads which are used for motor traffic throughout the State? If so, of whom would you suggest that it should be composed and what staff would be required (a) on the traffic and (b) on the engineering side?

15. It has been suggested that confusion and difficulty have resulted from the number of different levies made upon the motor transport trade. Would you advocate the substitution of a single tax for registration fee, municipal fee, permit fee, inspection fee, road cess and tolls? If so how should it be assessed? and in what way should the proceeds be distributed?

16. *Lorries*.—It has been represented that heavy lorries, especially those with solid tyres, do as much damage to roads as motor buses, and further that, if they exceed a certain weight, they are liable to break down culverts and break through the crust of macadamised roads. Do you recommend that any vehicle over a certain weight say, five tons, should be prohibited from using the roads?

17. Similarly, some roads, *e.g.*, those that are gravelled and not metalled, are broken up by any lorry traffic. Would you approve of the prohibition of all lorry traffic in such cases?

18. The Tolls Abolition Committee have recommended the following scale of taxation upon lorries in lieu of tolls:—

Description of the vehicle	Rate
	Rs.
Motor lorries used for transport of goods—	
Vehicles not exceeding $\frac{3}{4}$ ton in weight unladen	300 per annum
Lorries exceeding $\frac{3}{4}$ ton and not exceeding $1\frac{1}{2}$ tons	500 „
Lorries exceeding $1\frac{1}{2}$ tons and not exceeding $2\frac{1}{2}$ tons	800 „
Lorries exceeding $2\frac{1}{2}$ tons and not exceeding $3\frac{1}{2}$ tons	900 „
Lorries exceeding $3\frac{1}{2}$ tons and not exceeding 5 tons	1,000 „
Lorries exceeding 5 tons in weight	1,100 „

Do you consider this scale adequate, or would you still further increase the charge on the heaviest grades of lorries?

19. It has been recommended that, pending disposal of the above recommendation, the toll on a lorry should be raised to Rs. 3. Would you approve of this (a) generally or (b) for lorries of more than one and a half tons' capacity?

20. Lorries plying for hire are made to pay consolidated fees of Rs. 100 and Rs. 200 according as their carrying capacities are one ton or under, or more than one ton, respectively, in lieu of the road cess. (One and a half times these rates are leviable on railway competition roads.) A large number of cases have been detected in which lorries that had not paid this fee were plying for hire. Do you consider it (a) necessary and (b) practicable to distinguish between lorries plying for hire and lorries retained for private use? If so, do you consider the additional taxation imposed upon them adequate or would you graduate it with reference to their capacity?

21. It has been represented that lorries compete with the bus traffic by carrying passengers and that, in some cases, the lives of persons so carried have been endangered. Would you approve of a regulation prohibiting more than three persons, including the driver and cleaner, from being carried in any lorry?

22. The Railway Goods Tariff is roughly an *ad valorem* tariff, so that consignors of goods are under temptation to send those in respect of which the higher rates are fixed by lorry, while reserving those which only pay low rates of freight for the railway. Do you consider that it would be legitimate, in order to avoid this, to prohibit lorries running on roads parallel and adjacent to State Railway lines?

DRAFT TENDER NOTICE.

Tenders are invited for the monopoly privilege of running the motor bus services indicated in the schedule attached for a term of three or five years with effect from 1st July 1933.

2. Tenders may be submitted for any service or group of services in accordance with the convenience of the tenderer. The Government do not undertake to accept the highest or any tender in any case, or to adopt the grouping suggested by tenderers as that which would suit their convenience.

3. Tenders will be in terms of the rate of road cess per mile which the tenderer is prepared to pay for the service. Normally a separate rate must be quoted for each service, but there is no objection to a tenderer quoting a higher rate for a group of services than he would be prepared to pay for a single service out of the group. No tender for less than 6 pies per mile will be considered.

4. A deposit of Rs. 25 will be made with the tender for each service for which a tender is made, whether it forms part of a group or otherwise.

5. The successful tenderer will be required to adhere rigidly to the timetable and fare-table prescribed for the service for which he is licensed and to accept and adhere to any additions or modifications in the same which may be approved, from time to time, by the prescribed authority.

6. The successful tenderer will be required to maintain such number of vehicles for the running of the service and such reserve as is required by the prescribed authority.

7. He will also be required to provide such number of additional vehicles as may be necessary from time to time to deal with the traffic arising, and in the case of extensive seasonal traffic, as on the occasions of Jattras, to make arrangements for bringing into working a sufficient supplementary service for carrying all the traffic offering.

8. The vehicles used by the tenderer shall be inspected and certified as in satisfactory condition by such official as may be prescribed.

9. They shall be so constructed that the driver shall either be placed in a separate seat in front of the passengers or separated from the passengers by partitions.

10. There must be no bars or other obstructions preventing easy exit for passengers at the sides.

11. The owner of every vehicle shall get it examined once in every six months by a person approved by the District Magistrate as to its structural strength, condition and running order generally, and his certificate as to its fitness for use on the road shall be submitted by the owner to the District Magistrate. No vehicle shall be let or ply for hire for a period exceeding six months without its being examined and certified in the manner specified above.

12. In the case of a motor vehicle plying for hire on a ghat road, the owner shall get it examined once in three months by a person approved by the District Magistrate. The provisions of the above condition shall otherwise apply *mutatis mutandis* to such vehicles.

13. Every vehicle employed by the tenderer shall at all times be open to inspection by (i) any Magistrate of or above the second class, (ii) any police officer not below the rank of Inspector of Police or (iii) an Inspector of Motor Vehicles. If any such officer considers any vehicle to be unfit

for use on the road, he shall record his reasons in writing and shall communicate them to the owner as well as to the District Magistrate. The vehicle shall not then be let or ply for hire without the special permission of the District Magistrate until a certificate as to its fitness has been produced from a person approved by the prescribed authority.

Note.—The inspection under condition 13 is supplemental to, but distinct from, the examination under conditions 11 and 12; the object of such inspection being to verify, whenever and as often as may be necessary, the general fitness of the motor vehicles for use on public roads.

14. Every vehicle of the tenderer must carry at least two spare tyres and tubes and a full kit of tools.

15. Every vehicle must be insured against third party risks, and the permit for any vehicle will automatically expire if the policy is allowed to lapse.

16. Every vehicle must be in charge of a licensed driver and a conductor, who may also be a cleaner. The driver must be certified as physically fit by a District Medical Officer once a year.

17. He must possess a certificate that he is technically qualified by such authority as may be prescribed.

18. He must be over 25 years of age and must have held a driving license for not less than three years.

19. Except in the case of accident, he must never be on duty with his vehicle more than eight hours in the twenty-four.

20. The successful tenderer will be required to make a security deposit of Rs. 250 for each service for which he receives a permit. In the event of any breach of the conditions of his permit, he will be liable to a cancellation of the same, or to the suspension of all or any of his services, or to a fine not exceeding Rs. 50 for each offence, which may be deducted out of his security deposit. All sums so deducted must be replaced by him within one week of the deduction being notified to him.

JUDICIAL DEPARTMENT.

HIGH COURT OF MYSORE, BANGALORE.

No. P. 12-1—32-33, dated 17—18th November 1932.

Brief review on the working of the Process Establishment of the several Munsiffs' Courts in the State during the quarter ending September 1932.

PART I.

Under G. O. No. P. 728-29—Cts. 23-32-2, dated 29th July—1st August 1932, two Amins and three process servers from the Establishment of the Second Munsiff's Court, Bangalore, were transferred to that of the First Munsiff's Court, Bangalore, making no change either in the total number of Process Nazaraths (24) or in the number of persons employed therein (167 Amins and 475 peons).

The receipts and expenditure were Rs. 60,954-9-0 and Rs. 33,777-1-4 resulting in a net savings of Rs. 27,177-7-8.

The number of processes served was 75,539 against 72,479 in the corresponding quarter of the previous year and the averages for an Amin and a peon respectively were 74·7 and 170·5 as against 71·3 and 164·05 in the corresponding quarter of the previous year the prescribed minima for an Amin and a peon being 37·5 and 100 respectively.

The percentage of personal service for all the 24 courts taken together was 80·06 as against 77·3 in the corresponding quarter of the previous year. It ranged from 85·8 in the First Munsiff's Court, Bangalore, to 70·06 in the Munsiff's Court, Davangere, and all the courts served more than 65 per cent as shown below :—

APPENDIX B.

Annual Report of the Audit Board to the Senate for the year 1931-32.

I

The Board was reconstituted at the meeting of the Senate in November 1931 as under:—

1. Mr. K. R. Seshachar (elected by the members as Chairman.)
2. Mr. V. L. D'Souza.
3. Mr. J. Mahomed Imam.

The Board held its first meeting on the 28th May 1932 and decided upon the programme of inspection to be adopted and the points to be considered in respect of examination of accounts and matters relating to finances of the University. Some of the reports of inspection by the Special Auditor and the Comptroller in previous years were considered. The Special Auditor was present at the meeting by the request and explained the nature of the irregularities liable to occur in the accounts of public institutions. The Board met again on the 25th July 1932 at Mysore and examined the books and registers of the institutions in Mysore, (*viz.*, the University office, the Maharaja's College, the Medical College, the Intermediate College, the University Library, the University Union, the Maharaja's College Hostel, the Oriental Library, and the Archaeological Office) on the 26th, 27th and 28th July. The Bangalore institutions, namely, the Central College, the Engineering College, the Intermediate Colleges, the Medical School, the Union and the Hostels, were inspected during the three days, 8th, 9th and 10th August. The Board met again on the 11th to consider its recommendations.

The Chairman of the Board was invited to be present at the meetings of the University Council in which the Budget was discussed. He was present at one of the meetings.

Detailed reports of audits carried out and registers inspected have been separately forwarded to the Registrar in such cases as were thought necessary for information and needful action. The Board have not inspected the Shimoga Intermediate College. A separate Report will be sent in due course.

We have a few observations to make on the budget in general: The excesses and lapses on budget grants do not call for any special remarks as the deviations are generally small. Moreover, the expenditure on T. A., contingencies, equipment and similar items was kept down under instructions from the University with a view to retrenchment.

In this connection the Board desires to point out that the main expenditure of the University is on establishment and the amount required for all other items is about Rs. 4.5 lakhs. Of this amount, a sum of nearly Rs. 2 lakhs is absorbed by repairs of buildings, remuneration of examiners and payment of scholarships, the expenditure on which is subject to proper checks. The balance, namely, Rs. 2.5 lakhs is the expenditure defrayed under equipment, library, laboratories, contingencies and T.A. A very large portion of this amount is also subject to satisfactory checks owing to the system of purchase through Stores Purchase Committee and pre-audit of bills before payment. The amount paid without proper check namely through imprest and D. C. bills works out to a small sum of about Rs. 25,000 for all the institutions of the University. Payments of stipends and scholarships and on the receipt side the cash transactions on account of the collections of fees of various kinds form a fairly considerable amount. The possibility of leakage of funds is confined to these amounts namely, imprest money, payments of stipends and cash receipts. Clerical irregularities and defalcations are therefore the main risks to be safeguarded against.

Further, the appointment of a special auditor and recently instituted periodical inspections by the Comptroller have helped to minimise irregularities and systematise accounts considerably. The Board have gone through most of the audit reports and reviews of the Comptroller and find that on the whole the accounts have been brought to a satisfactory condition.

We now pass on to consider in some detail those matters which, in our opinion, require attention. Action may be taken on the lines suggested, if need be, after consultation with the Comptroller.

(a) The cash transactions in all the institutions were entrusted to accountants from whom no security had been taken except in the Central and the Engineering Colleges where the securities amounted to Rs. 500 and Rs. 100, respectively. Moreover, except in the Central College, the checks exercised on the collection and verification of cash even on days of heavy transactions, such as collection of fees and payment of salaries, and scholarships, are found to be inadequate. In the case of the Medical College and the Medical School due to the onerous duties of the officers in charge, the cash transactions were left to the clerks in charge entirely, even the key of the chest being left with them although the formal entries in the cash book were found to be correct.

In the Women's Intermediate College at Bangalore the cash transactions were being scrutinised very carefully by the Superintendent and all arrangements for scrutinising cash were completely satisfactory. It is suggested that the attention of the heads of institutions should be invited to the necessity for careful verification and check at least on days of heavy transactions and that security deposits should be recovered from all clerical hands dealing with cash.

All the institutions have valuable properties in the shape of equipment, library books and furniture. The arrangements for their custody and accounting are not the same in all institutions. In the Science Colleges generally, the charge of these properties is sectionalised and the professor of each department makes himself responsible for his section. In the Arts Colleges the heads of institutions themselves look to the proper accounting of the properties in their charge. The Principal or the Professor, as the case may be, receives the articles when additions are made to the stock and gets them posted in what are called "Accession Registers" and generally attests such posting. In some cases the annual counting and verification of stock is based on these registers and the procedure appears unobjectionable, but in several instances it was found that the annual counting was checked from a new register into which the items had been posted from the accession register, but the transfer of these items from the one to the other was not duly attested by the authority in charge. We are not certain that this may not turn out to be a fruitful source of leakage. The bills, vouchers and the accession books are lost sight of in course of time and the register from which the annual verification is made comes to be the only record showing the properties of the University. The point to be borne in mind is that the permanent register (the accession register or the transfer register as the case may be) on which the annual counting is based is the real record showing the belongings of the institution as such a register should show signs of careful check and be unimpeachable.

It is a common practice especially in institutions equipped with laboratories and workshops to make payments for articles, contingent or otherwise, urgent or not, from imprest. Imprest is really intended for urgent purchases or purchases of perishable articles. To pay for equipment, etc., out of imprest is to remove from the scope of pre-audit a very large number of transactions. At present there is a limit only on the amount an institution can pay on a single bill, irrespective of the nature of the articles purchased or the urgency of the payment. It is not surprising therefore that some institutions disburse 40 per cent or even more of their

annual grant out of imprest, the imprest being renewed at frequent intervals, in some cases from three to five times a month. The Registrar stated that steps were being taken to call for annual indents of all articles required so that payment of all bills other than contingent may be made after pre-audit and countersignature. This procedure may be found difficult in practice and some latitude will have to be allowed to colleges with laboratories and workshops to manage. We suggest that for each institution according to its needs an annual limit may be fixed for payments through imprest, all bills other than contingent being sent for pre-audit and countersignature to the Registrar's Office. However, if this proposal is to work satisfactorily, audit of bills in the Registrar's Office has to be expedited. Some institutions urged the necessity for an increase of imprest to save the trouble of recoupment. In view of the suggestions made, an increase of imprest appears unnecessary.

In the Maharaja's College, however, there is a genuine need for enhancing the imprest amount. It is fixed at a small sum, *viz.*, Rs. 25 and the institution has to meet the demands from the Psychological Laboratory in addition to the ordinary demands.

The registers in use in the various institutions admit of standardisation and simplification. They appear formidable in number, size and complexity and no two registers though used for the same purpose in the different institutions appear alike. Thus, while the form of the cash books (one for receipts and the other for disbursements) is prescribed by the University Office, the institutions have been permitted to print their own registers. In the result, the cash books in use vary from college to college. Some of them, judging, by their size, must have involved considerable outlay. In addition to the cash books, several registers are maintained in each institution for different purposes. But they differ considerably in form, bulk, quality of paper, thickness of binding, etc. Standardisation of registers is very necessary both to simplify accounts and to avoid delay. It is desirable that the University Office should supply the registers to the institutions.

(e) There is no up-to-date account manual laying down clearly the powers and duties of the heads of institutions. A revised manual is urgently required to remove indefiniteness and uncertainty. The principals and heads of departments were quite agreeable to give effect to the rules and orders if only they could be made available in a handy form. An account manual brought up-to-date will serve as a work of reference and go a long way to minimise errors and reduce delays. It will also enable the auditors to discover which rules have become unworkable or which rules are frequently violated.

(f) There are several thousand volumes of publications issued both by the University and Oriental Library. They are evidently intended for sale, but anticipations regarding demand have not been fulfilled. We shall not be far wrong if we estimate their value at over half a lakh of rupees. The copies are stored in the cellars of the Oriental Library. A part of stock is soiled and damaged. Some of the publications are as old as twenty years. If the books are not disposed of quickly, they may become utterly useless and a large write-off will be necessary. It is desirable to reduce prices to stimulate demand. To push sales, it seems wiser to reduce the price to the public than to increase the discount to the sellers.

(g) The Audit Board is re-constituted every year. The accounts of the University and the examination of the finances are technical matters requiring sustained and careful study. All that the Audit Board can do in one year is to get a superficial idea of the financial working of the University. To do really useful and effective work, it is felt that the same Board should be in continuous touch with the accounts and finances of the University for a much longer period than one year. It is, therefore, suggested that in future the Audit Board should be appointed for the life of the Senate.

9. (i) We enquired into the working of the hostels. We kept in view the impression prevailing in certain quarters that all is not well with the management of these institutions. We could find no support whatever for the notion that the hostels are not run efficiently. The vouchers, the receipts, the cash books, the issue registers, in short, the accounts, generally, have been carefully checked by the authorities responsible for the management of the hostels. However, it appeared to us that if the purchases in all the hostels were systematised and put on an impersonal basis, the monthly charge could still further be reduced. If proof were needed for our remark, it is found in the disparity in the charges between the months of July and August practically in all the hostels.

	July 1930-31			August 1930-31		
	Rs.	a.	p.	Rs.	a.	p.
Maharaja's College Hostel	11	11	2	12	12	0
Central College Hostel (all items)	25	8	1	27	7	10
Engineering College Hostel	11	4	5	11	7	6

The disparity is due to the fact that in the month of July the Warden is solely responsible for the purchases; while in the month of August and the remaining months the prefects elected by the Boarders do all the marketing. The Warden has larger experience and better facilities than the prefects and he can be depended upon to get the best value for the outlay. The problem is how to retain the prefect system and yet secure the purchase of articles on

the best terms in the cheapest markets. Our suggestions with which the Wardens are generally in agreement are as follows:—

(1) Purchase of all the principal commodities like, rice, oil, ghee, fuel, wheat, dhal and sugar should be placed, as far as possible, with a co-operative store. The prices in a co-operative store are fixed. The quotations may be obtained from time to time; there is a possibility of reduction of price for large and regular purchases; there is also the possibility of a rebate on purchase. Moreover, the quality of the commodities is dependable and there is no risk whatever of unfair dealing. In one of the hostels, we discovered that the purchase of coffee showed differences in conversion of weight by maund into weight in pounds—the range of variation being from 24 lbs. to 28 lbs. Similarly, the price of coffee per maund varied from Rs. 14, to Rs. 18-4-0 within a couple of months. To avoid such losses, purchases should be made through a co-operative society. In the Central College Hostel, the system of purchases from stores was instituted in November 1931 and the Warden assured us that as a result there was a drop in the monthly charges. The Warden and the prefects may not be bound to buy from a society alone. It may be left to their discretion to deal with a wholesale firm if they find it cheaper or more dependable than a co-operative store, *e.g.*, plantain leaves from Nanjangud, cocoanuts from Turuvekere or Tiptur, coffee from Chikmagalur or Hunsur. Emphasis is laid on bulk purchases and the economies to be effected from large scale dealing.

(2) Purchases of articles which are wanted in small quantities or which are perishable are also, like the durable commodities mentioned in the preceding section, entrusted to the prefects. Such purchases are made every day and one has to go to the bazaar for them. The prefects act on their own responsibility. There is room for leakage, deception, loss and malpractices of all kinds and the shop-keepers are not slow to take advantage of the inexperience and trustfulness of the prefects. Nor can the Warden exercise any check on the purchases for the vouchers, in most cases, cannot be had from the illiterate dealers in the bazaar. It is, therefore, suggested that all purchases in so far as they cannot be placed through a co-operative store may be made on the joint responsibility of the Warden or the manager and the prefect, so that as between the two, the shop-keeper will be forced to deal fairly and squarely.

(3) To complete the chain of control and check, all issue of articles to the cooks and servants must be carefully weighed and controlled not by the prefect alone as at present but by the prefect assisted by the office. In one of the hostels, we discovered marked differences in quantity between the book balances and the actual quantity in stock, *e.g.*, the shortage in seers after the rice was cleaned by the servants varied between a little over a seer per palla to 20½ seers per palla, evidently an instance of leakage. Supervision by the prefect and the manager jointly is absolutely necessary to prevent unnecessary shortage, wastage and leakage.

(4) We also emphasize the necessity for monthly or quarterly audit of the hostel accounts by a private agency. The Maharaja's College Hostel engages the services of an auditor who carries out a scrutiny every month detecting errors and irregularities, if any. At the end of the year, he makes a report on the accounts which enables all those interested in the affairs of the hostel to make a correct appraisal of the accounts kept and the measures adopted by the authorities. The system of private audit may be introduced also in the other hostels of the University. In addition to private audit, the University Office may depute a special auditor to check the accounts occasionally.

10. So far, we were concerned with the examination of the accounts of the University. We now pass on to consider the ways and means and the financial effects of important measures in contemplation and make recommendations bearing on the improvement of the finances of the University:—

(1) The University has on hand various schemes tending towards simplification of studies and consequent reduction in expenditure. Thus, it is proposed to abolish one or two Intermediate Colleges, reduce the number of papers in Honours courses, limit the options in the B.A. (Pass), grant the M.A., and M.Sc. Degrees on the results of one year's study instead of two, do away with certain degrees like the B.Sc. and B.Sc. (Hons.) in some of the colleges. These proposals are bound to have a favourable effect on the finances of the University. The extent to which the simplification and reduction process can be carried on without detriment to the growth of the University, is a point worth considering and also the amount of economies in salary and equipment that such a process may be made to yield.

(2) Although the University is put in charge of such departments as the Archaeological Office, the Oriental Library, the Medical School and the scheme for Backward Communities Scholarships which may be said to be the proper concern of the Government, comments are made in the Legislative Council and the Representative Assembly as if the whole grant for the University is for purposes of the University education alone. The University Council recently considered the advisability of showing these items of expenditure in a separate form. The public has to be informed that the University is not the sole beneficiary of the Government grant but that it shares with Government the responsibility

of administering certain departments which involves the diversion of a considerable part of the grant. These activities do not fall strictly within the legitimate sphere of the University and all expenditure upon them must be shown as a real deduction from the Government grant.

(3) The Chairman of the Audit Board expounded a scheme for combining the mechanical and electrical branches of Engineering in the University. The members of the Audit Board though not engineers themselves are in a position to appreciate his point of view and support his scheme. The Chairman points out that in India, as in fact all over the world power from Hydro-electric schemes or from steam-generated electricity is replacing all other kinds of power. Judging from the engineering needs of the present and even more of the future, a considerable part of the syllabus for mechanical engineering has become practically useless or unnecessary. The best way out of the difficulty would be to combine the two branches of engineering into one, the combination being based on the needs of the present day. Mr. Forbes, the late Chief Electrical Engineer of the State, was of the same opinion and suggested a combined scheme. The Andhra University seems to have some such scheme in contemplation. If the combination proposed is found to result in considerable savings, as we expect it will, the saving could be utilised in financing chemical and technological engineering in which the scope for employment seems to be considerable and continually expanding.

(4) The College of Engineering has fairly well-equipped workshops and laboratories. With slight additions, it seems possible to undertake repair work or new work of a minor character for private parties. Construction of small electrical fans, motor and transformers and repair of motor cars, pumps and oil engines are instances in point. There is a two-fold advantage from such activities: one is to recoup at least a portion of the expenditure on the laboratory and the workshop and the other is to train the student in practical work so that he is not afraid to set up for himself when he passes out of the college. In the report of the Benares University "sale of Manufacture" appears as a source of income and in 1925-26 the Engineering Department earned about Rs. 30,000.

(5) At a time when the finances of the University are strained to the utmost and when every passing year brings fresh demands upon its slender resources, it is worthwhile considering the possibility of recruiting a part of the teaching staff from young men eminently qualified in various subjects who are without employment and also from senior men who, though retired from official life, are actively interested in the subjects which they formerly taught. These can be at best part-time lecturers. It may be contended on behalf of the suggestion that it will reduce the salary bill to some extent and that it will utilise the intellectual resources of the community which now run to waste for want of adequate employment. That there is no novelty in the suggestion is borne out by the system of part-time professors and lecturers in the Medical College. We desire to point out that the suggestion admits of further expansion and application especially in the Science Colleges of the University. Thus, in the Engineering College, subjects like railways, sanitary engineering, irrigation, architecture, water supply, reinforced concrete, can be dealt with by experts with long experience in the Public Works Department.

(6) The University, has now reached a stage when strenuous attempts should be made to build up an endowment fund. Perhaps, the limit to which the University can look to Government assistance has been reached. At any rate there is no immediate prospect of the grant being increased to keep pace with the needs of an expanding and developing University. Complete autonomy amounting to self-dependence in financial matters will free the University from the leading strings of the Government and enable it to pursue the ideals of a modern University unhampered by considerations of administrative convenience or Government policy. As yet we cannot conceive of a day when the University could depend on its own resources irrespective of Government grants. But it should not be beyond the persuasive capacity of the University Council and the members of the Senate to induce people to co-operate in the noble task of collecting funds for the upkeep and development of their University and thus supplement the very limited assistance from Government. The endowment fund can only come from the patrons of art and learning, the captains of industry and the merchant princes. Private philanthropy in the State is keenly alive to the duty of relieving distress and assisting the afflicted. Large amounts are made over every year in normal times to build hospitals and dispensaries, chattrams and choultries, town-halls and high schools. It has to be stimulated in the cause of University education. Already the University has attracted a considerable amount of funds in the shape of scholarships and freeships, prizes and medals. The time has now come when the University should boldly and persistently appeal to the public for support in the spirit in which the Benares and Andhra Universities have done. It is the responsibility of the University like ours, supported as it is by the tax-payers, to demonstrate to the public the real value of University education and especially to convince the unlettered by means of extension lectures, educational films, wireless performances all over the State, the

utility and justification for spending public money on higher education. No University will prosper in the material sense if it hides its light behind a bushel. It must be the aim of the University to make the people participate in the tangible and intangible benefits of University education. The ground having been prepared, University Council will proceed to evolve an organisation for the collection of the endowment fund. District committees of Senate members, co-operation between the University Executive and men of influence, propaganda, social service and settlement work by the alumni—these are some of the suggestions that readily spring to mind. But the details of the organisation may be thought out by the University Council.

II.

"We visited the Intermediate College, Shimoga, on Tuesday, 27th September 1932. The accounts for the months of February and March 1932 were checked by us and found correct.

The Superintendent sends the cash collections daily to the treasury and the balance, if any, is carefully checked by him and kept in the safe.

All items of expenditure, however small, are supported by vouchers.

The imprest money is Rs. 20. It is ample for the purpose of imprest. It is hardly ever recouped more than once a month.

The library register is properly kept and all the postings therein are duly checked by one of the staff who acts as a Librarian.

The stock register contains all the items of furniture. The annual counting is based upon an "abstract register" but the entries therein are not duly attested by the authorities. To prevent leakage, it is quite necessary that all such entries should be checked by the Superintendent.

The number of students on the rolls is 46 and the number of admissions in the Junior class is 20. The strength of the college has steadily diminished from 74 students in 1928-29 to 46 in 1932-33. From a financial standpoint, it does not seem desirable to maintain a college at Shimoga. The college seems to attract students of the middle class, i.e., sons of parents with moderate means who generally happen to be residents of Shimoga. The well-to-do students migrate to Bangalore or Mysore as they can afford to do so. The poor students also are attracted to the Colleges in Mysore and Bangalore as in these cities they could depend upon the support of the charitable institutions who dispense free boarding and other kinds of assistance to needy students."

IV. GENERAL.

1. When any award is not made in any year, the amount left over shall be added to the corpus of the fund.

2. When such a measure is likely to enhance the income of the fund, the investment may, with the sanction of Government, be altered by the University Council, but always so as to have the guarantee of His Highness' Government both for the principal and for the income.
